

## **ScoringAg Electric / Solar Tractors for Farming**

Farming is one of the highest costs for food and feed production.

Farming can produce significant noise and air pollution with neighboring properties and requires new strategies in farming practices.

Tremendous fuel and oil savings by using ScoringAg Electric / Solar Tractors is the answer not only in developed countries, also in countries where fuel is scarce or high priced.

### **Advantages**

**by using**

#### **ScoringAg Electric / Solar Tractors for Farming**

- **No more oil and fuel purchases**
- **No air pollution** zero emissions
- **No noise pollution** energy source ~ solar generates no noise
- **No spills** by refueling equipment
- **No hydraulic leaks**
- **No toxic waste** an “empty” plastic quart container of motor oil typically contains between 1 to 2 ounces of residual oil
- **Labor cost savings**  
low maintenance required, reduces machinery downtime for maintenance  
some models have the ability to do 2 jobs at a time like spraying and fertilizing
- **Healthier for workers**, no vibration on the back and shoulders from the engine vibrations
- **Highest return on investment**
