

Drying Wagon for Flat Bed Drying by ScoringAg

The Ultimate in Precision Drying!

The mobile Flat Bed Drying Wagon is a most unique and economical Drying Wagon. It was designed for drying edible beans, rice, ear corn, small specialty grains, peanuts/nuts and grass seeds or onions/garlic at a highly controlled temperature to obtain minimum damage during drying and handling. The dryer is totally self-contained with mounted fan, heater and controls.

By utilizing its copyrighted design air flow with the sweat drying principle it assures the owner of an evenly dried crop. Being efficient, it is applicable not only to foundation seed growers and seed companies or elevators, but for the farm as well.

The Flat Bed Drying Wagon is highly portable and built strong! It is made of 14/16 gauge steel, supported by 6 or 8 inch (20.32 cm) I beams for durability. Some of its qualities are:

- Multiple conditioning applications for seed production**
- Labor saving as can be loaded in the field**
- Low maintenance flatbed design and utility**
- Long lasting heavy weight construction**
- Dries evenly from front to back, even bagged crops**
- No percolation as open floor supports are used**
- No wet spots because channel lock floor is perforated**
- Easy to clean out with sub-floor swing door**
- Dryer can be used for grain storage too**
