

## **ScoringAg's Modular Container Facilities©**

**Economic solutions for very small and small-size scale farmers, co-op groups and small processors; addresses food safety requirements and climate change issues, helps Countries to achieve food independence and curb Youth migration**

ScoringAg's Modular Container Facilities© (MCF's©) are turnkey designed for self-contained solutions for the agriculture, aquaculture and small factory needs in any Country in the world. Besides the fact, there is no expensive building needed, the containers operate in a sanitary environment that is theft and fire proof.

Our MCF's© can carry a complete line of agriculture farm equipment and all support equipment from soil preparation, planting, cultivation and crop care to harvest equipment for post harvest handling and processing, as well as food safety and storage supplies.

Our wide range of turnkey Modular Container Facilities© and turnkey Supply Units© are used from the most necessary first step in agriculture and aquaculture production to point of sale:

- Fish and Seafood from harvesting to sanitary trucking, processing and packaging
- Ocean Salt and mineral recovery
- Mobile and stationary slaughter units for large Animals and Poultry to Meat Fabrication and Meat canning.
- Egg Hatcheries and sanitary Egg Handling
- Milk Sheds from 6-70 cows and 20+ Goats/Sheep
- Dairy Milk products and Cheese processing
- Fruit & Vegetable Units for transporting, processing, cleaning-sizing-packaging, dehydrating, canning, juice processing
- Nuts processing, drying, packaging and storage
- Grains, Beans & Rice harvest, drying processing. Grain Flour processing, Rice milling and packaging
- Edible Oil, Honey & Syrup processing and packaging
- Feed processing & Fertilizer manufacturing and packaging
- Service custom work units to support the agriculture production like Well Drilling and solar powered Irrigation System, Crop Harvest & Thresher Units
- Farming Units© from Field pre tillage and planting to harvest with diesel tractor and out-fitted with proper equipment and tools to plant, care for and harvest the specified crops

**The affordable state of art technology or our MCF's© are adding value to any agriculture or aquaculture products from field to fork.**
